

Varshaa S B

Third year B.Sc. Information Technology student at Vellalar College for Women with excellent academic record and keen interest and practical exposure in the field of algorithms, automata, software engineering and data science.

Experienced Full-Stack Developer specialized in MERN Frameworks & GenAI Applications. Building Intelligent, Scalable Software Solutions and actively contributing freelance services to clients.

Education

Bachelor of Science, Information technology Vellalar College for Women, CGPA – 8.8/10	2024-2027
Grade 12 th (Senior Secondary Examination - HSC) CBSE Board, 94.6%	2023-2024
Grade 10 th (Secondary Examination - SSLC) CBSE Board, 93.8%	2021-2022

Technical Skills

- **Languages:** Java, C, C++, SQL, R, HTML, CSS, JavaScript, PHP, TypeScript, MERN frameworks.
- **Core Engineering:** Python, LangChain, RAG, Vector Databases [Pinecone, Chroma].
- **GenAI tools:** GitHub Copilot, Claude 3.5, ChatGPT, Cursor, Replit, Vercel. [Specialising in Prompt Engineering]
- **Tools/Platforms:** Git, Unix/Linux, Google Cloud Platform, AWS, Tableau, Power BI, Docker, WordPress
- **Research/project disciplines known:** Probability Theory, Statistics, Algorithmic Game Theory, Mathematical Modeling, Data Analysis, Machine Learning.

Experience

MERN based Full Stack Developer, W3AppDevelopers	May'26-Present
Developed and hosted the corporate website for W3AppDevelopers, a digital solutions company providing web, cloud, AI, and software services, using MongoDB, Express.js, React.js, Node.js, TypeScript. • Built a full-stack MERN application featuring content management modules (CMS) for services, blogs, categories, and media assets. Implemented responsive React user interfaces, admin dashboards. • Built secure REST APIs, authentication systems, and scalable MongoDB database architectures. • Integrated Cloudinary, Firebase, Socket.IO, JWT authentication, Redux, Docker, Nginx. • Automated real-time email/SMS notification services through Gmail SMTP and Firebase. • Managed application deployment workflows, hosting, SEO optimization, security implementation, cloud integrations, performance monitoring.	

Internships

Data Science intern, IFC Infotech Software Solutions (12 weeks)	Jul-Sep'25
• Project 1 - EcoTrash: Real-Time Trash Classification Application	

A native Android application that uses image recognition in real-time to assist users in proper waste disposal. The application uses a Java-based Android frontend and a Python backend trained on the TACO dataset to classify waste into Biodegradable, non biodegradable, Compostable, landfill category.

Languages: Python, Java, XML, JSON, SQL

Frameworks: TensorFlow Object Detection API, Android Studio, FastAPI, OpenCV, Quantization and Model Deployment

Libraries: OpenCV, CameraX, NumPy, MobileNetV2, Matplotlib, Scikit-learn, Pandas

• **Project 2** - **SmartGradePredict: Multi-Domain Regression Modeling in Python**

Developed dual regression models using Linear, Ridge, and Lasso to predict student performance scores based on real world datasets. Visualized insights using seaborn and matplotlib.

Academic Projects

Computer Vision & Machine Learning

12th grade

Aug-Dec'24

VEHICLE SPOTTING | Technical domain: Python, OpenCV, TensorFlow

- built a Python program VEHI-SPOT which reliably automates collection and identification of number plate using video footage and capture vehicle number using OCR.
- Applications of the project caters for traffic & parking management by sending real-time data and communicating to appropriate RTO authorities and FASTag system. It uses ANPR system along OpenCV.

Training

- Six weeks AWS cloud computing training & certification.
- Mastered **Claude Code in Action** presented by Anthropic Claude

Jun-Jul'25

Jun'26

Achievements

- Department Merit Proficiency Award for Academic Excellence.
- Gold Medalist, Science Olympiad Foundation (SOF) on International Mathematics Olympiad (IMO), Level 2
- Top 10 finalist - Leetcode Virtual Contest. Total Score: 3500+ points.

Certifications

- Secured Top 5% score in NPTEL online certification *Programming with Generative AI* (8 weeks) **Aug-Oct'25**
Secured **Elite Gold** certification in NPTEL *Programming in Java* (12 weeks) **Jan-Apr'26**
- **50+ Online Certifications** in Software & IT domain.
(Key areas: PHP, Web Development, Databases, Cloud, Cybersecurity)
Including courses from leading platforms such as IBM, Amazon, Google, Microsoft, Meta, Accenture
- MOOCs: Udemy – Certification on Full Stack PHP from scratch course.

Leadership and Responsibilities

- **Placement Secretary** – Union Office Bearer at Vellalar College for Women **2026-Present**
Coordinated campus recruitment, recruiter engagement, interview scheduling, communication, placement events, and student support for campus hiring initiatives.
- **Chief Election Commissioner | Student Council Elections** **2023-24**
Coordinated election schedules, nomination processes, organized polling and voting procedures.
- Green Ambassador – initiative for greener environment in college premises.
